- Objectives and methodology
- Start of workday
- Workday routine
- Use of Web
- Online purchases
- Company demographics
- Personal demographics

Survey objectives

Forbes.com and GartnerG2 in conjunction with Survey.com conducted an online research study to examine topics related to C-level and other senior executive lifestyles. The specific goals of this study included:

- Understanding general lifestyle information such as work habits and personal habits of other senior executives
- Gathering demographic information about C-level and other senior executives

Survey methodology

An online survey was conducted to collect the data for this study.

- The survey was online from December 19, 2002, to January 31, 2003.
- An email invitation with an embedded link to the survey instrument was sent to 1.5 million members comprising the entire corporate executive opt-in email list available within the Yesmail database and 19,000 members of the Forbes.com opt-in email list.
- In total, 19,198 people viewed the Web page containing the survey instrument. Of this pool of viewers, 11,350 people completed the survey. To encourage participation in the study, respondents were entered into a pooled drawing to win a grand prize of \$500.
- The respondents have been categorized into 3 groups for analysis purposes:
 - All respondents
 - C-level Executives
 - Senior management (Senior VP and above), in companies with 1,000+ employees

Highlights

- The Web is a pervasive presence in C-level executives' lives: more than half (53%) say they access the Web before they go to work while only 41% said they read a newspaper before going to work..
- Not surprisingly, 82% of C-level executive respondents said they check their e-mail before they start other work (only 6 % said they have an assistant do it for them).
- 35% of C-level executives visit business/financial Web sites before they start other work.
- More of the C-level respondents (58%) do online research than use the Web to check their portfolio (33%). (Only 11 % delegate online research to their assistants).
 - 58% say they find what they “want” online
 - 46% say they find what they “expect” online
 - 24% buy/sell financial investments online
- Nearly half (48%) of C-level respondents say they "click on online ads" when they see something of interest to them.

Start of the Workday

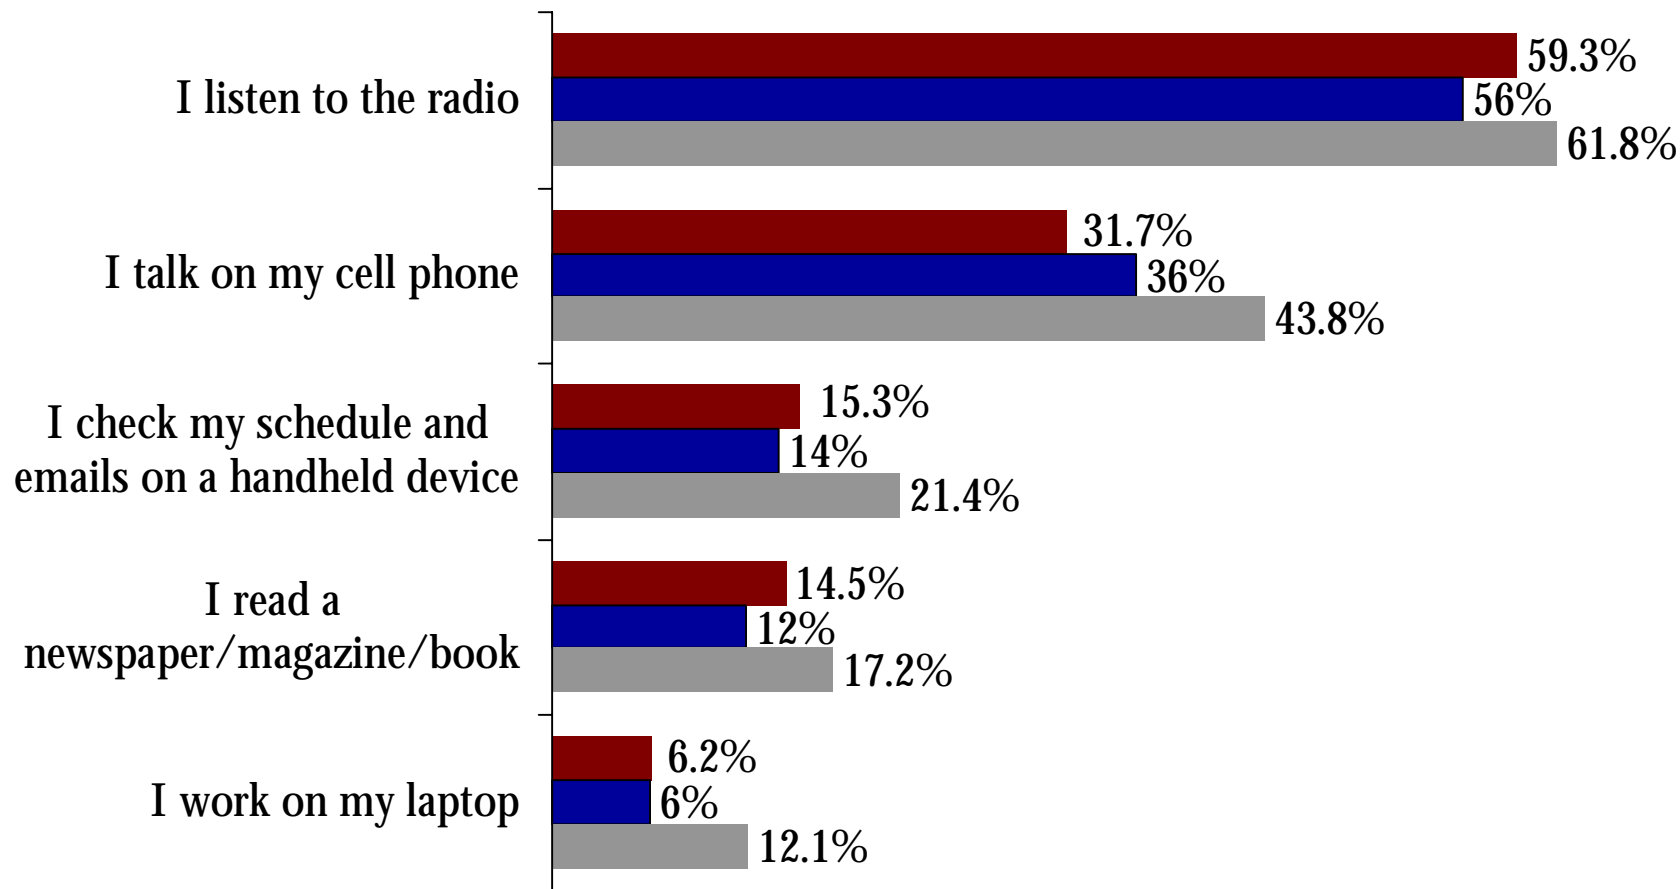

- Before I go to work...

Q. Thinking about your daily work routine, please indicate which of the following relate to the start of your work day and traveling to work.

Start of the Workday

- While I commute...

■ All ■ C-level Management ■ Senior Management in Large Companies (1,000+ employees)
